Databases
PostgreSQL, MySQL, MongoDB

Game development
HTML5 games, playable ads, gameplay logic

Concepts
OOP, RESTful APIs

Tools
Git, Figma

LANGUAGES

English — **C1 · Advanced**

Polish — **B2 · Upper Intermediate**

Innovative Software Engineer with over 1 year of commercial experience developing interactive products and web applications, including HTML5 games and client dashboards. Skilled in selecting appropriate languages and frameworks to solve complex problems. Collaborates effectively with cross-functional teams, seeking to contribute to a product or game team while embracing new technical challenges.

EXPERIENCE

Junior JavaScript Developer · PlayToMax — Mar 2026 – Oct 2026

- Developed HTML5 playable ads and minigames in JavaScript, enhancing user engagement in mobile advertising campaigns.
- Designed game rules and mechanics using OOP architecture, ensuring clean, reusable code for future modifications.
- Optimised builds for performance and compatibility on mobile devices and ad platforms.
- Sole developer collaborating with an artist and a PM, managing all technical implementation and asset integration.

Junior Software Engineer · VIEN | Vitality & Energy — Sep 2025 – May 2026

- Developed websites and web applications for clients, managing the full cycle from requirements to testing and release.
- Designed and developed backend logic, APIs, and databases for authentication, user data, and content management.
- Built client dashboards where users securely view analysis results, track changes over time, and access their data in one place.
- Implemented charts and structured result views so clients could understand their health metrics without specialist help.
- Created an admin panel for staff to manage users, analysis data, content, and access roles, replacing manual routines.
- Collaborated with managers and designers to clarify requirements and deliver features iteratively.
- Maintained existing products through bug fixing, refactoring, and small feature updates.

EDUCATION

Master's Degree, Software Engineering — Expected Dec 2026

National Technical University of Ukraine "Igor Sikorsky Kyiv Polytechnic Institute" (FICE), Kyiv · in progress

Bachelor's Degree, Software Engineering — Jun 2025

National Technical University of Ukraine "Igor Sikorsky Kyiv Polytechnic Institute" (FICE), Kyiv

HOBBIES & INTERESTS

- Video games: playing and analysing games across genres, with a particular interest in game design, mechanics, and storytelling
- Reading about animals: wildlife, behaviour, and nature
